SAMBIT KUMAR SATAPATHY

SOC Analyst | SIEM and Incident Response

Hyderabad, Telangana, India | Phone: +91 7735207434 | Email: sambitsatapathy22@gmail.com

Portfolio: sambit.page | GitHub: github.com/Sambittt | LinkedIn: linkedin.com/in/sambit-satapathy

PROFESSIONAL SUMMARY

Security Operations Center (SOC) Analyst with hands-on experience deploying and operating a Wazuh Security Information and Event Management (SIEM) platform, onboarding endpoints, writing custom detection rules, and investigating security events. Skilled in log analysis, incident response, vulnerability assessment, and network traffic analysis using Nmap and

Wireshark. Strong documentation skills including runbooks, incident notes, and technical reporting.

SKILLS

SIEM & Monitoring: Wazuh (manager, indexer, dashboard), Splunk, log collection & correlation, alert triage, custom rules
Incident Response: Security event investigation, incident response workflow, SOAR (Tines), EDR (LimaCharlie), playbooks
Vulnerability Assessment: Nmap scanning, network reconnaissance, vulnerability identification, security exposure reporting
Network & Traffic Analysis: Wireshark, TCP/IP, DNS, HTTP, UFW firewall, suspicious traffic detection
Operating Systems: Linux (Ubuntu, Kali), Windows 10, Windows 11, Windows Server
Scripting & Admin: Bash, cron, user and group management
Frameworks: MITRE ATT&CK, Cyber Kill Chain, NIST, SANS incident response lifecycle
Cloud & Tools: AWS EC2, Docker, Git, GitHub, VMware, VS Code

Reporting: Incident documentation, security procedure documentation, management reports

PROFESSIONAL EXPERIENCE

Security Operations Center (SOC) Intern, Wazuh Cloud Project (AWS)
Infozit | Team of 4 | July 2026 - Present
- Deployed and configured a pre-production Wazuh SIEM including manager, indexer, and dashboard on AWS EC2.
- Onboarded Windows 11, Windows Server, and Ubuntu Server endpoints using Wazuh agents for centralized log collection.
- Configured a custom web server to generate and forward HTTP traffic logs to the SIEM.
- Authored and tested custom detection rules to identify simulated brute-force and web-based attacks.
- Built the initial Wazuh stack using Docker and configured Role-Based Access Control (RBAC) for secure team access.

- Managed detection rules and configuration through Git pull-request workflows and maintained operational runbooks.

PROJECTS

SOAR and EDR Incident Response Playbook (LimaCharlie, Tines, Slack)
- Enrolled a Windows 10 virtual machine as a LimaCharlie EDR sensor and simulated credential-theft activity using LaZagne.
- Created and validated a custom Detection and Response (D&R) rule using historical replay.
- Forwarded EDR detections to a Tines webhook and built a SOAR workflow that sends alert details to Slack.
- Automated endpoint containment through the LimaCharlie API, with separate YES and NO analyst decision paths.

- Tested both response paths and documented the complete incident-response workflow.

EDUCATION AND TRAINING

Bachelor of Computer Applications (BCA) | CGPA: 8.0/10
Gayatri Institute of Science and Technology, Berhampur University, Odisha

Cybersecurity Program (SOC Focused)
Teks Academy, Hyderabad | July 2026 - Present

- SOC operations, networking, ethical hacking, SIEM, EDR, forensics, cloud security, Linux, UFW firewall, and Bash scripting.

CERTIFICATIONS & CREDENTIALS
